

# OHIO STATE'S STRATEGIC PLAN

# TIME AND CHANGE

*Enable, Empower and Inspire*

## SUMMARY POINTS:

- Ohio State's momentum has never been greater — with all-time university records in applications, graduation rates, academic excellence and diversity, donor support and more.
- To take the next bold leap in our land-grant history, we engaged faculty, staff, students, alumni, friends and community leaders across Buckeye Nation to create Ohio State's strategic plan, Time and Change.
- Building on our existing strengths — including a vibrant student experience, research excellence, athletic prowess and a highly engaged Buckeye family — we aspire to be a leading national flagship public research university. The plan sets forth five pillars of focus:
  1. Teaching and Learning
  2. Access, Affordability and Excellence
  3. Research and Creative Expression
  4. Academic Health Care
  5. Operational Excellence and Resource Stewardship
- Our strategic plan is a living framework that allows for flexibility moving forward. Translating strategy into execution will be the work of all Buckeyes, requiring ongoing collaboration across the university and with stakeholders.
- Our strategic plan will help ensure that we are the best university we can be. When we are at our best, we make a real difference to people.
- Our size, breadth, geography, history and standard of excellence position us to drive the future of higher education.
